**Advisory Action  
Before the Filing of an Appeal Brief**

Application No.

10/743,313

Applicant(s)

YANG, HYE-WON

Examiner

Steven B. Theriault

Art Unit

2179

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 27 September 2007 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1.  The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a)  The period for reply expires \_\_\_\_\_ months from the mailing date of the final rejection.  
 b)  The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2.  The Notice of Appeal was filed on \_\_\_\_\_. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3.  The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because  
 (a)  They raise new issues that would require further consideration and/or search (see NOTE below);  
 (b)  They raise the issue of new matter (see NOTE below);  
 (c)  They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or  
 (d)  They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: \_\_\_\_\_. (See 37 CFR 1.116 and 41.33(a)).

4.  The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).  
 5.  Applicant's reply has overcome the following rejection(s): \_\_\_\_\_.  
 6.  Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).

7.  For purposes of appeal, the proposed amendment(s): a)  will not be entered, or b)  will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: \_\_\_\_\_

Claim(s) objected to: \_\_\_\_\_

Claim(s) rejected: \_\_\_\_\_

Claim(s) withdrawn from consideration: \_\_\_\_\_

AFFIDAVIT OR OTHER EVIDENCE

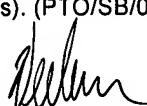

8.  The affidavit or other evidence filed after a final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).  
 9.  The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).  
 10.  The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

11.  The request for reconsideration has been considered but does NOT place the application in condition for allowance because:  
See Continuation Sheet.

12.  Note the attached Information Disclosure Statement(s). (PTO/SB/08) Paper No(s). \_\_\_\_\_

13.  Other: \_\_\_\_\_

  
 WEILUN LO  
 SUPERVISORY PATENT EXAMINER

Continuation of 11. does NOT place the application in condition for allowance because: The applicant's request for reconsideration has been carefully reviewed and is not persuasive for the following reasons: The examiner refers to MPEP 2123 and 2144 that states that an entire reference cited is considered relevant to the rejection and not just the cited sections. Further the Examiner refers to 2111, and other sections, that guide the Examiner to not read limitations from the specification into the claims. Turning to the arguments, it appears the applicant has substantially argues the same points as presented in the previous submission filed 04/30/2007, Page 7, Top) and therefore the Examiner incorporates the response sent 07/27/2007 into this response. In summary, the examiner interprets the teachings of Hinegardner as providing two action sequences; The first sequence moves/copies the file into the queue and the second moves/copies the file from the queue to its permanent location , as taught by the invention, are shown in column 4, lines 1-11 and column 5, lines 30-45. The first sequence is one action point and click. The point and click interval can be set to any desired interval the user desires (see column 4, lines 5-7). Which can include, an infinite number of settings that can be seconds, minutes or hours. The system is designed to work with two action sequences and each sequence is comprised of a number of steps however result in a single click and press. Hinegardner teaches that the user can perform other functions prior to completing the second action sequence (See column 6, lines es 10-32). Therefore, the Examiner interprets a sequence of steps as follows: the user can set the internal from the pasting the file into the queue at zero seconds for the first action sequence and that would satisfy the pasting at an interval set by the user. The second action sequence would also have a user set interval and the user can set the interval to several minutes and wait before performing the operation and do other tasks and the return to perform the second action sequence, which would imply a time period or interval embedded between the second and third process as well. To be clear the claims recite pasting before an interval is greater and if the interval is zero seconds the paste would happen instantaneously and without delay and therefore would happen before the counter was greater than the interval. The second limitation displays the data in the menu after the predetermined period has expires and the user in performing the second action sequence can see the items in the queue (See column 8, lines 20-30) prior to performing the second action sequence to move and then perform the sequence which would be after the first interval in the first action sequence and the second interval in the second action sequence.
